### LUMI MARKER

#### #EPL-LM

- \*The ink only appears when illuminated by black UV light.
- \* The ink is invisible under normal lighting or sunlight.
- \* Can be used for fine or thick lettering according to the material to be marked.
- \* Will easily mark material that is difficult to mark with a pencil or tailor's chalk
- \* Suitable for marking white colored or thin parts where tailors chalk would be too conspicuous

#### #UVM-1

**Washable UV marker pen**  
**Felt tip (ink type)**

#### #UVM-2

**Permanent UV marker pen**  
**Felt tip (ink type)**

### SUPER LUMI MARKER

#### #EPL-SLM

- \*Marks appear blue when illuminated by black UV light.
- \*Marks disappear when the material is heated in an iron press.
- \*Compared with the Lumi Marker (ink-type), illumination is much greater.
- \* Under normal lighting conditions, can be used like white waxed tailor's chalk.

#### #EPL-SLM-C

### RED Refill

#### #EPL-SLM-C-R

- \*Marks appear Red when illuminated by black UV light.
- \*Marks disappear when the material is heated in an iron press.
