

TNC Reinforced Sewing Needles

Made in Taiwan

for household sewing machines HAX1 & overlock machines ELx705

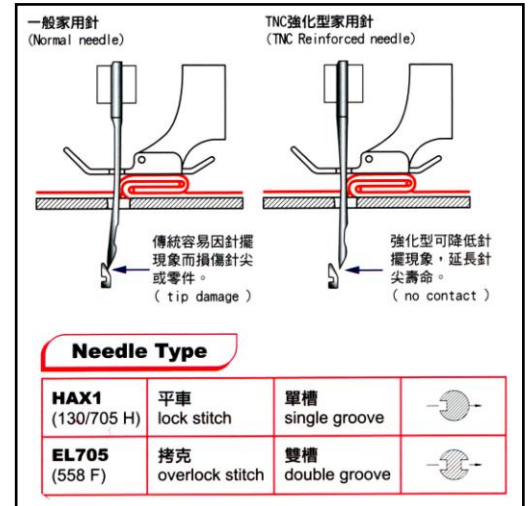

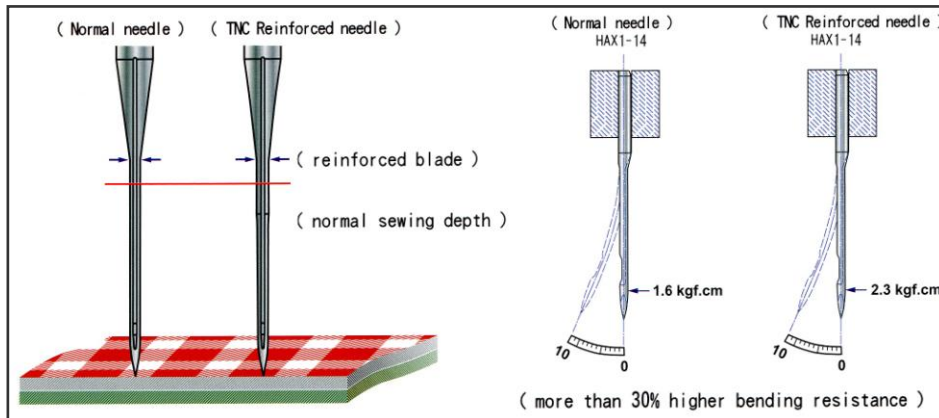

* All needles hard chrome plated with light ball point (R) or universal point.

Features:

- Chromium plating – better hardness and lower friction – more rigid and less deflection.
- 40% longer life than conventional needle.
- Less machine parts damage.
- Less skipped stitches.
- Less needle deflection and shaking.
- Optimum beautiful seams.

Highest Quality for more flexibility in different fabric types without changing needle
